## EXPERIENCE

---

### Figma

#### Software Engineer - Figma Make

8/2025 - Now

- Worked on Figma Make, an LLM-powered tool for creating prototypes from designs and prompts.
- [REDACTED]
- [REDACTED]
- [REDACTED]

#### Software Engineering Intern - Prototyping

1/2024 - 5/2024

- Built an experimental LLM feature that converts text descriptions into prototyping interactions.
- Wrote early tech doc on prompt chaining, improved dataset and metrics for v1 eval platform.

#### Software Engineering Intern - Monetization

1/2023 - 4/2024

- Engineered an A/B test on product education during free trial to improve paid plan conversion rate.
- Iterated with XFN on design and copy decisions for trial entry, sidebar upsell, and expiry experiences.

### Vercel

#### Software Engineering Intern - v0

9/2024 - 12/2024

- Helped build v0, an LLM-powered tool that transforms prompts into production-ready websites.
- Shipped multimodal capabilities with image attachments and API for project thumbnails.
- Authored growth and collaboration features in project organization and plan upgrade flows.

## EDUCATION

---

#### Stanford University - MS in Computer Science

9/2024 - 6/2025

**Coursework:** Natural Language Processing, Reinforcement Learning, Computer Vision, HCI Frontiers

#### UC Berkeley - BA (honors) in Computer Science and Data Science

8/2021 - 5/2024

**Coursework:** Algorithms (TA), Machine Learning, Operating Systems, Databases, UX Research

**Awards:** Phi Beta Kappa, Upsilon Pi Epsilon, Regents' and Chancellor's Scholarship, Fung Fellowship

## EXTRAS

---

- **Skills:** React.js, Python, Ruby, HTML/CSS, Java, SQL, LLMs, A/B Testing
- **Hobbies:** Pour-over coffee, Running, Golf, Travelling
- **Quests:** Taught CS in Ethiopia. Featured in SF Chronicle discussing food influencing. Led Cal Hacks.
